

AYUSHI BATHAM

Bangalore, Karnataka, India | +91 8851901115 | bathamayushi18@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience delivering enterprise applications and developer tooling across telecom, banking, supply chain, and logistics domains. Strong hands-on experience in Core Java, Spring Boot, Angular, React, TypeScript, JavaScript, Node.js, REST APIs, SQL, API integration, unit testing, CI/CD, debugging, and responsive UI development. Experienced across end-to-end SDLC delivery and cross-functional engineering collaboration.

CORE SKILLS

- Languages:** Core Java, JavaScript, TypeScript, SQL
- Frontend:** Angular, React, AngularJS, RxJS, HTML5, CSS3, SCSS, Responsive UI Development, IBM Carbon Design System
- Backend:** Core Java, Spring Boot, Spring Framework, Node.js, Express.js, REST APIs, SOAP (Basic)
- Databases:** MySQL, SQL, MongoDB
- Tools:** Git, GitHub, Jira, Postman, Maven, Harness (CI/CD), VS Code, Eclipse, Agile, SDLC, OOP, SOLID Principles, Design Patterns, Debugging, Root Cause Analysis, Figma (Basic)

PROFESSIONAL EXPERIENCE

Software Developer — IBM Software Labs, Bangalore, India

Apr 2025 – Present

Project: TAZ – Functional Test Automation (FTA)

- Developed **10+ reusable Webview components** using TypeScript, JavaScript and Angular, improving development efficiency by **25%**.
- Integrated **15+ REST API workflows** for test preparation, file management and execution, reducing manual test-preparation effort by **35%**.
- Automated bulk test generation for **100+ test cases**, reducing test setup time by **40%**.
- Implemented secure credential management using VS Code Secret Storage and asynchronous API workflows for enterprise testing.
- Resolved **30+ frontend, backend and integration defects** through debugging and root-cause analysis.

Project: TAZ – Early Development Testing (EDT)

- Developed **8+ automated testing workflows** integrating REST APIs and remote execution capabilities, reducing manual verification steps by **30%**.
- Delivered **10+ Test Explorer enhancements** and resolved **25+ execution defects**, improving test-execution reliability by **20%**.
- Contributed to Eclipse plugin development using Core Java, implementing **5+ developer-facing features** and reusable utilities.
- Collaborated with **15+ engineers** across India and US teams to resolve cross-service dependencies and coordinate feature delivery.
- Participated in code reviews, integration testing, release validation and production support.

Application Developer — IBM Consulting (GBS), Noida, India

Apr 2021 – Mar 2025

Delivered **4 enterprise applications** across telecom, supply chain, banking and logistics domains using Angular, React, TypeScript, JavaScript, Core Java, Spring Boot, Node.js, REST APIs and SQL.

Project: DISH BSS

- Developed **20+ CPQ and Portfolio Inventory features** using Angular and REST API integration for a commercial TV platform.
- Integrated **15+ REST APIs** across configuration and inventory workflows, reducing manual processing effort by **25%**.
- Reduced configuration errors by **15%** through workflow enhancements and validation improvements.
- Resolved **30+ functional and production defects** across application releases.

Project: SCA-AWS Supply Chain

- Developed **15+ Node.js REST APIs** and **20+ Angular components** supporting supply-chain operations.
- Improved user productivity by **20%** through UI and workflow enhancements.
- Automated **8+ business workflows**, reducing manual processing effort by **30%**.
- Resolved **25+ API and UI defects** across feature and production cycles.

Project: Royal Bank of Canada (RBC)

- Engineered **15+ Node.js REST APIs** supporting financial operations and frontend integrations.
- Developed **50+ unit test cases**, achieving **90% test coverage** across backend API workflows.
- Resolved **30+ API defects** through debugging and root-cause analysis, reducing recurring issues by **20%**.
- Supported **5+ release cycles** through API validation, regression testing and production issue resolution.

Project: Maersk Group – MLIT Build

- Delivered **15+ logistics workflow enhancements** across Angular UI and backend service integrations.
- Integrated **10+ APIs** supporting logistics workflows and business operations.
- Resolved **35+ functional defects** across **6+ release cycles**, improving application stability by **20%**.
- Reduced manual workflow steps by **25%** through UI and process enhancements.

Software Engineering Intern — BinPlus Technologies, Jhansi, India

May 2019 – Jul 2019

- Developed **10+ Android screens** and **5+ booking workflows** (search, navigation, booking, confirmation) for a Bus Ticket Booking app using Java and XML.
- Built a KBC Quiz Android application implementing quiz navigation, answer validation, and score calculation supporting **50+ questions**.

PROJECTS

Raksha — Spring Boot, Core Java, MySQL, Angular | Team: 5

- Developed **10+ REST APIs** using Spring Boot and Core Java and integrated them with Angular frontend workflows.
- Implemented **8+ database-driven features** using MySQL, including CRUD operations and business validations.
- Built **5+ reusable frontend components** to support full-stack functionality and reduce duplicate development.

Polling Meter — Python (Flask), HTML, CSS, JavaScript | Team: 5 | 1 month

- Developed frontend workflows for an online voting application, contributing to responsive UI and user interaction flows.

EDUCATION & CERTIFICATIONS

B.Tech. (Hons.), Computer Science and Engineering — APJ Abdul Kalam Technical University, Lucknow | Aug 2016 – Oct 2020 | 85.1%

- Microsoft Certified: Azure Fundamentals (AZ-900) — Mar 2022
- Google Cloud Digital Leader — Feb 2025
